AMENDMENTS TO THE CLAIMS

This listing of Claims shall replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-83. (Cancelled)

84. (Currently Amended) A system comprising:

a multi-layer multi-component display comprising:

a first display screen; and

a second display screen overlapping said first display screen; and a user interface component for designating at least one of said first and second display screens as an active display screen for responding to an input.

- 85. (Previously Presented) The system of Claim 84, wherein said user interface component comprises at least one of a mouse, a keyboard, and a joystick.
- 86. (Previously Presented) The system of Claim 84, wherein said user interface component comprises a touchscreen.
- 87. (Previously Presented) The system of Claim 84, wherein said user interface component comprises at least one of a pen and a stylus.
- 88. (Previously Presented) The system of Claim 84, wherein said user interface component is operable to designate said at least one active display screen in response to a sound.

PURE-P002 Application No. 10/049,272 Page 2

Examiner: Nguyen, K. Group Art Unit: 2629

- 89. (Previously Presented) The system of Claim 84, wherein said user interface component is operable to transition a display of a graphical object to said at least one active display screen.
- 90. (Previously Presented) The system of Claim 89, wherein said input is operable to adjust said display of said graphical object on said at least one active display screen.
- 91. (Previously Presented) The system of Claim 89, wherein said graphical object comprises at least one of a cursor, an icon and an image.
- 92. (Previously Presented) The system of Claim 89, wherein said graphical object is associated with a gaming application.
- 93. (Previously Presented) The system of Claim 89, wherein said graphical object is associated with at least one of a drawing application and a graphical application.
- 94. (Previously Presented) The system of Claim 84, wherein said input comprises a user input.
- 95. (Previously Presented) The system of Claim 94, wherein said user input comprises an input to said user interface component.
- 96. (Currently Amended) A method of designating at least one active display screen in a multi-layer multi-component display, said method comprising:

Examiner: Nguyen, K.

detecting a first input from a user interface component;

determining at least one display screen of said multi-layer multi-

component display associated with said first input; and

designating said at least one display screen of said multi-layer multi-

component display as said at least one active display screen for responding to a

second input.

97. (Previously Presented) The method of Claim 96, wherein said user

interface component comprises at least one of a mouse, a keyboard, and a

joystick.

98. (Previously Presented) The method of Claim 96, wherein said user

interface component comprises a touchscreen.

99. (Previously Presented) The method of Claim 96, wherein said user

interface component comprises at least one of a pen and a stylus.

100. (Previously Presented) The method of Claim 96, wherein said user

interface component is operable to generate said first input in response to a

sound.

101. (Previously Presented) The method of Claim 96 further comprising:

transitioning a display of a graphical object to said at least one active

display screen.

102. (Previously Presented) The method of Claim 101 further comprising:

detecting said second input; and

PURE-P002 Application No. 10/049,272 Page 4

Examiner: Nguyen, K.

adjusting said graphical object displayed on said at least one active display screen in response to said second input.

103. (Previously Presented) The method of Claim 101, wherein said graphical object comprises at least one of a cursor, an icon and an image.

104. (Previously Presented) The method of Claim 101, wherein said graphical object is associated with a gaming application.

105. (Previously Presented) The method of Claim 101, wherein said graphical object is associated with at least one of a drawing application and a graphical application.

106. (Previously Presented) The method of Claim 96, wherein said second input comprises a user input.

107. (Previously Presented) The method of Claim 106, wherein said second input comprises an input to said user interface component.

108. (Currently Amended) A computer-usable medium having computer-readable program code embodied therein for causing a computer system to perform a method of designating at least one active display screen in a multi-layer multi-component display, said method comprising:

detecting a first input from a user interface component;

determining at least one display screen of said multi-layer multicomponent display associated with said first input; and

Examiner: Nguyen, K.

designating said at least one display screen of said multi-layer multicomponent display as said at least one active display screen for responding to a second input.

- 109. (Previously Presented) The computer-usable medium of Claim 108, wherein said user interface component comprises at least one of a mouse, a keyboard, and a joystick.
- 110. (Previously Presented) The computer-usable medium of Claim 108, wherein said user interface component comprises a touchscreen.
- 111. (Previously Presented) The computer-usable medium of Claim 108, wherein said user interface component comprises at least one of a pen and a stylus.
- 112. (Previously Presented) The computer-usable medium of Claim 108, wherein said user interface component is operable to generate said first input in response to a sound.
- 113. (Previously Presented) The computer-usable medium of Claim 108, wherein said method further comprises:

transitioning a display of a graphical object to said at least one active display screen.

114. (Previously Presented) The computer-usable medium of Claim 113, wherein said method further comprises:

detecting said second input; and

Examiner: Nguyen, K.

adjusting said graphical object displayed on said at least one active display screen in response to said second input.

- 115. (Previously Presented) The computer-usable medium of Claim 113, wherein said graphical object comprises at least one of a cursor, an icon and an image.
- 116. (Previously Presented) The computer-usable medium of Claim 113, wherein said graphical object is associated with a gaming application.
- 117. (Previously Presented) The computer-usable medium of Claim 113, wherein said graphical object is associated with at least one of a drawing application and a graphical application.
- 118. (Previously Presented) The computer-usable medium of Claim 108, wherein said second input comprises a user input.
- 119. (Previously Presented) The computer-usable medium of Claim 118, wherein said second input comprises an input to said user interface component.

Examiner: Nguyen, K.
